

YOUR SLOT COMES UP PCs act on any open PC slot — decide together who goes.	1 MANEUVER move, aim, cover... (menu below). ▶ Incidentals — speaking, dropping things — are free.	1 ACTION attack, any skill check, or trade it for another maneuver.	NEED A 2ND MANEUVER? suffer ▶ 2 STRAIN or spend 2 Advantage . Hard cap: 2 per turn.
--	---	---	--

◆ MANEUVERS — PICK ONE

MANEUVER	WHAT IT DOES
Move	Engage or disengage a foe, or shift one range band (1 maneuver to short/medium; 2 to reach long or extreme).
Aim	Next combat check:  (aim twice in a row:  ). Called shot at an item/limb instead:  (one  if aimed twice).
Take Cover	Gain ranged defense 1 while behind it.
Guarded Stance	Melee defense 1 until your next turn, but  on your own attacks.
Drop Prone / Stand	Prone: ranged attacks at you suffer  , melee attacks gain  . Standing up is a maneuver too.
Interact	Open the door, flip the table, hit the console.
Manage gear	Draw / holster / reload (clears Limited Ammo) / pass an item.
Assist	Engaged ally's next check gains  .

◆ ATTACKING — DIFFICULTY BY RANGE

RANGE	MELEE / BRAWL	RANGED (LIGHT)	RANGED (HEAVY)	GUNNERY
Engaged	 	 	  	can't
Short	—			
Medium	—	  	  	 
Long	—	   	   	  
Extreme	—	    	    	   

Each  = one purple Difficulty die. Melee & Brawl only work engaged, and are always two. Firing a ranged weapon while engaged raises the short-range base (+1 light, +2 heavy) — it stacks with other increases.

◆ GETTING HIT

- **Wounds** = damage – Soak (min 0). **Stun damage** deals strain instead, Soak still applies.
- Wounds *exceed* Wound Threshold → knocked out + **1 Critical Injury**.
- Strain *exceeds* Strain Threshold → knocked out, no crit.
- **Defense**: each point =  on matching attacks against you (cap 4). Sources that *provide* defense don't stack — use the highest; effects that *increase* it (Defensive X) add on top.

◆ CRITICAL INJURIES

- **Trigger**: wounds past threshold · spend **Advantage** = weapon's Crit rating on a damaging hit · spend a **TRIUMPH**.
- Max **one crit per hit** — extra activations add **+10** to its roll.
- Roll **d100**: +10 per crit the target already has, +10 per rank of Vicious.

◆ WEAPON QUALITIES YOU'LL SEE

Stun setting	Flick it (free): deal strain instead of wounds.
Pierce X	Ignore X Soak.
Vicious X	+10×X on crit rolls.
Blast X	2 Adv : everyone engaged with the target takes X. On a miss, 3 Adv hits them all anyway.
Auto-fire	Declare first: +1 difficulty. 2 Adv per extra hit (may spread to other targets; each hit can crit).
Defensive X	+X melee defense while wielded.
Cumbersome X	Brawn short of X? +1 difficulty per point.
Limited Ammo X	X uses, then reload (Manage gear).
Disorient X	2 Adv : target adds  to everything for X rounds.
Knockdown	2 Adv (+1 per silhouette over 1): target goes prone.

◆ GETTING BETTER

- **After the fight**: Simple (no purple) **Discipline** or **Cool** check — recover 1 strain per **Success**.
- **Stimpack** (a maneuver): heals 5 wounds; each further one today heals 1 less (4, 3, 2, 1, then nothing). Resets tomorrow.
- **Medicine check**: heals 1 wound / **Success** + 1 strain / **Advantage**. Difficulty: wounds at half threshold or less  · over half   · past threshold    . Treating yourself: +2 difficulty.
- **A night's rest**: 1 wound, all strain.

◆ READING THE DICE, COMBAT EDITION

- **Did I hit?** 1+ net **Success** = yes, and every net Success adds +1 damage.
- **Advantage** pays even on a miss: recover 1 strain, boost an ally — or bank it into crits & qualities on a hit.
- **TRIUMPH**: a Success plus something spectacular — a crit, regardless of cost.
- **Threat / Despair**: the GM's currency against you. Full menus: the **Reading the Dice** sheet.
