

CONDITIONS & RECOVERY

status effects, the critical-injury table, healing, hazards — what the other sheets don't repeat

FFG STAR WARS · PLAYER REFERENCE

◆ STATUS EFFECTS

YOU ARE...	WHICH MEANS
Staggered	No actions this turn — not even trading one for a maneuver. Maneuvers are fine.
Immobilized	No maneuvers this turn. Actions are fine (you can still shoot or talk).
Disoriented	■ on every check while it lasts.
Incapacitated	Wounds <i>over</i> threshold (plus a crit) or strain <i>over</i> threshold: out of the fight until healed back to the line. Soak still applies to hits on you.

Prone, cover, defense: **Ground Combat** sheet.
Stun damage (strain) ≠ **Staggered** (no actions).

◆ HEALING & RECOVERY

- **Rest.** A full night's sleep recovers **all strain**. A full day of rest heals **1 wound**.
- **Medicine check.** Difficulty by the patient's *current* wounds: up to half threshold ■ · over half ■■ · over the threshold ■■■. Heals **1 wound per Success, 1 strain per Advantage**. Treating yourself: ■■. No medpac or sick bay: ■.
- **Critical injuries** heal with a Medicine check at the crit's **severity** (table below) — **one attempt per crit per week**. Until then it stays.
- **Stimpacks** and the after-fight strain check: **Ground Combat** sheet.

◆ CARRYING TOO MUCH

- **Encumbrance threshold** = **5 + Brawn**. Worn armor counts **3 less** than carried.
- Over the threshold: ■ on every check **per point over**.
- Over by **more than your Brawn**: you also lose your free maneuver — every maneuver costs strain.

◆ FALLING

FELL	WOUNDS	STRAIN	CRIT
Short	10	10	—
Medium	30	20	yes
Long	50	30	+50
Extreme	100	50	+75

Soak applies. **Average** (■■■) **Athletics** or **Coordination**: -1 wound per **Success**, -1 strain per **Advantage**; a **Triumph** shortens the fall by one band.

◆ SEEING & BEING SEEN

CONCEALMENT	TO HIT / SPOT
Mist, shadow, waist-high cover	■
Fog, smoke, darkness	■■
Thick smoke, pitch black	■■■

The same dice land on Perception and Vigilance checks to notice someone hiding in it.

◆ MORE WEAPON QUALITIES

Breach X	Ignore X <i>armor</i> — 10 Soak per rank.
Burn X	2 Adv : base damage again each round for X rounds. Average Coordination to put it out.
Concussive X	2 Adv : target Staggered X rounds.
Ensnare X	2 Adv : target Immobilized X rounds; Hard Athletics (action) to break free.
Linked X	2 Adv : one more hit at the same damage, up to X extra.
Stun X	2 Adv : X strain on top. (Not the Stun <i>setting</i> .)
Sunder	1 Adv : damage an item the target is wielding one step.
Accurate / Inaccurate X	X ■ / X ■ on the attack.
Superior	+1 damage and a free Advantage every shot.
Prepare X	X maneuvers of set-up before it fires.

◆ OBLIGATION — THE SESSION ROLL

- Session start: the GM rolls **d100** against the party's **total Obligation**. At or under → it triggers, for whoever's range it lands in.
- Triggered: **everyone -1 strain threshold** this session; the PC whose Obligation it is, **-2**.
- **Doubles** (11, 22, 33...): effects doubled — -2 and -4 — and the debt comes calling *now*.

◆ MORALITY & CONFLICT (FORCE USERS)

- Using a **dark side result** on the Force die: flip a Destiny Point, suffer **1 strain** per dark pip, gain **1 Conflict** per dark pip.
- **Session end**: roll **d10**, subtract Conflict earned. Positive → Morality goes *up* that much; negative → *down*.
- **71+** light-side paragon · **30 or less** fallen. Cruelty and lies earn Conflict too; torture and murder, a great deal. No one in this era can tell you what the nightmares mean — except whoever reaches you first.
